Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 23 is objected to because of the following informalities: In line 6, "form" should be changed to --from--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. Claim 22 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not disclose that "heat" may be used to dry treated organic matter. Instead, the specification discloses that "energy" could be used to dry solids. Accordingly, the recitation of "heat" to dry the solids is new matter.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over Eby et al. in view of Wagner.

Eby et al. disclose a method for aerobic thermophilic treatment (col. 3, lines 28-33) including the steps of passing air through a reactor, recycling air through the

Art Unit: 1724

reactor, removing ammonia from the air (col. 1, lines 47-66; col. 2, lines 34-42). Eby et al. do not disclose passing a fluid through the reactor to dry organic matter.

Wagner discloses receiving heat from a fluid in order to dry sludge to ultimately produce a useful product.

It would have been obvious for the skilled artisan to have modified the method of Eby et al. such that it includes receiving heat from the fluid to dry the sludge in order to ultimately produce a useful product, as suggested by Wagner.

5. Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over Eby et al. in view of Norcross et al.

Eby et al. disclose a system including a reactor (2), an aeration system (col. 2, lines 25-26)), a recirculation system including a blower (28, 34) located outside of the reactor, and a system for removing ammonia (30). Eby et al. do not disclose releasing the gas to the atmosphere.

Norcross et al. disclose releasing a portion of the gas in a reactor in order to avoid overpressurising the reactor (col. 7, lines 40-51).

It would have been obvious for the skilled artisan to have modified the system of Eby et al. by releasing a portion of the gas in order to avoid overpressurising the reactor, as suggested by Norcross et al.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References are cited of interest to show the state of the art.

Art Unit: 1724

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
